Noodle Seed

Sales pitch to working demo in minutes.

We're Already Working With Google Cloud ☁️

- Active pilot with Google Cloud sales teams
- Additional solution sales firms using our platform
- Live beta at noodleseed.com (actively developing with user feedback)
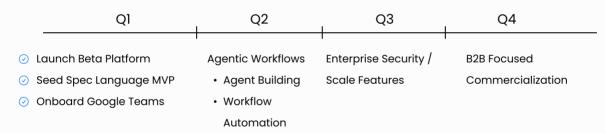

What Makes Us Different

- No code, no APIs, no integrations, no deployments, no environment variables
- Just immediate interactive sales demos in minutes
- Enabling agentic workflows in the demos that are built using Noodle

Proprietary Technology

- **Proprietary Seed Specification Language:** Our domain-specific language that translates business intent to technical specifications, requiring 25x fewer tokens than direct code generation
- **Growing advantage:** As LLMs improve, our language's efficiency creates even more reliable, faster and cost effective results
- Open Source commercial technology with dual license model

Team & Investment

- Ex-Google founder + 4 founding product engineers (more joining soon)
- Raised $500K
- More ready to hire with investment (Looking to onboard Amazon Principal Engineer as CTO)
