Noodle Seed

Transform 2-6 Week Projects into Minutes

Used by Google Cloud

Automate the Ordinary, Create the Extraordinary

The Problem

Market Challenges

Only **34%** of projects completed on time (Wellingtone, 2024)

Software prototyping takes **weeks to months**

High cost of development resources

Complex integration between cloud platforms

Enterprises need faster, more efficient development

Our Solution

Noodle Seed Platform

- ✓ Reduces prototype development from weeks to **minutes**
- ✓ Built using Google's best practices
- ✓ One interface builds UIs, APIs, and automations
- ✓ Works across cloud platforms without manual integration

Noodle See

Proprietary Technology

Core Innovations

Seed Specification: 25x more efficient than direct code generation

AI agents replace multiple developer and design roles

One interface builds UIs, APIs, and automations

Works across cloud platforms without manual integration

Open source core with proprietary enterprise features

Transforming how enterprises build software
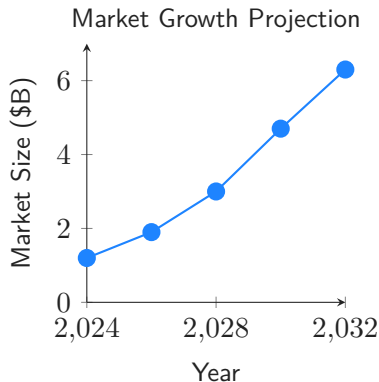

Massive Market Opportunity

Market Growth

Prototyping software market: **$1.2B in 2024**

Growing to ~**$6.3B by 2032**

AI-assisted development reduces time by **40-50%**

Market growing at ~**22% CAGR**

Expanding to full custom SaaS in the future

Market Growth Projection

Traction & Validation

Current Status

- ✓ Active trial at Google Cloud and other software companies
- ✓ Founded by ex-Google AI lead
- ✓ Built using industry-leading practices and technologies
- ✓ Rapid prototype iterations and real-world use cases
